New but Not...

Chat With Jana

The *Chat With Jana* webinar on Friday, July 19 will spotlight FLYP's partnership with the Florida Dairy Farmers. As a special bonus, everyone who attends the live session has a chance to win a special basket of goodies from the Florida Dairy Farmers. Whether you can attend the live session or not, be sure to contact Ms. Smith to request a great kit of programming ideas and activities.

If you have had a cooperative program with the Florida Dairy Farmers and would like to speak about it, please contact Jana Fine at jana.fine@dos.myflorida.com.

Ideas Wanted!

Please send Jana your ideas for future *Chat With Jana* webinars.

FLYP Wiki

Access 2013 FLYP program materials as well as Viva Florida 500 youth materials at flyp.pbworks.com.

Summer Reporting Form

2013 FLYP Summer Reading Program Reporting is due September 13. For questions on how to fill out the online form, access the archived FLYP Data Collection webinar or contact Jana.

Ongoing Training

If you work in a Florida library, you are eligible to enroll in more than 350 self-paced online courses offered through [WebJunction Florida](#).

Have a WJ account but can't remember the password? Try [WebJunction](#) (case sensitive) and you'll be prompted to reset your password.

2013 Celebration Weeks and Promotional Events

Click on the links to see how you can bring these promotions to your library. Don't

their own businesses, and financial literacy programs for teens.

Free Books!

Twenty libraries will be selected to receive a set of the 2013 Teen's Top Ten titles, courtesy of the Dollar General Literacy Foundation.

Visit [YALSA's Teen Read Week website](#) for details and to access the application. Apply by September 1, 2013.

Makerspaces & DIY Programs

Share your ideas, tips, and resources about makerspaces and DIY-type programs via YALSA's newest wikipage which offers activities, resources, makerspaces, and potential funding. Check out the [Summer of Making and Connecting](#).

Baby Smash!

As babies smash on the keyboard, colored shapes, letters and numbers appear on the screen. Baby Smash will lock out different program keys so babies and toddlers can't get out of any applications. This software is free and babies (and parents) will enjoy the experience together.

Adding Playful Interactions to Story Time Gets Kids

Excited About Reading

To help parents lay the foundation for literacy, the Association for Library Service to Children

(ALSC), has created the LEGO® DUPLO® Read, Build, Play 2013 [Summer Reading List](#). Featuring

rich stories that are proven winners, the list has five books for children 1-3 and five books for children 3-5.

Sneak Peek Book Reviews

by Guest Reviewer Laurel Gainer, Umatilla Public Library, Lake County Library System

Graham, Ian. *You Wouldn't Want to Be on the First Flying Machine!* (2013). New York : Children's Press.

Graham's book, part of the "[You Wouldn't Want to...](#)" series, is set in the late 1800's, as Orville and Wilbur Wright review all the previous flying machine designs. Fascinated by all the different designs, the Wright Brothers decide to tackle their own flying machine. They progress from small models to larger models they can test. The final design actually

works... almost. They decide to start over, do some avionic research and mix in some unique ideas of their own. The brothers start with a glider and then add a power design and props to boost the power and wind speed. The final result of their successful design

forget to share your activities with others.

is the very first trip by air, overseas, to France. Graham has written a wonderful book that is formatted as an idea book with colorful design sketches and cartoon pictures.

Jemison, Mae. *The 100 Year Starship*. (2013). New York : Children's Press.

The 100 Year Starship, part of the [True Books](#) series, touches on the history of how we explore the world we live in and how evolving technology has helped us break the bounds of this world into outer space. Dr. Jemison started the 100 Year Starship Foundation to explore options on making star travel possible in the next 100 years. She explains some of the challenges of stellar travel, such as how to make a spaceship, how to protect it, and how to power it for deep space travel. Where should we go? What should we do when we get there? Jemison touches on these puzzles and other interesting space facts. Beautiful pictures and resources entice the reader to further explore this fascinating subject.

Jemison, Mae. *Discovering New Planets*. (2013). New York : Children's Press.

Discovering New Planets, part of the [True Books](#) series, explores the mechanics of how the universe and our solar system was made and how it works. Dr. Jemison shares details of how we explore outer space from here on Earth and the challenging task of searching for planets in and out of our solar system. She goes into the various ways to listen, view and take pictures of planets so far away. What kind of planets might we find beyond the borders of the known universe? What kind of life forms might these planets hold? Wonderful pictures are generously interspersed with facts and statistics. This book is a great research tool for the young reader, or just a great read.
